Brief outlines for the University of B.C. Biochemistry 301 and 303 courses are given below. Please outline all undergraduate biochemistry courses that you have successfully completed that are equivalent to or more advanced than these courses.

**Bioc 301     Biochemistry Laboratory** – Techniques by which the chemical and physical properties of fundamental components of the cell are studied.

**Bioc 303     Molecular Biochemistry** – Structure, function and metabolism of lipids, steroids, amino acids and nucleotides; the biochemistry and molecular biology of replication, transcription, translation and gene regulation. For Majors and Honours students in Biochemistry and Honours students in other life science programmes.

Please outline any previous experience you have that may be relevant to your application.
