

# EMPLOYMENT OPPORTUNITY

Launched by the Terry Fox Foundation in 2007 as a Canada-wide organization for cancer research, the Terry Fox Research Institute's mission seeks to advance our understanding, diagnosis and treatment of cancer with the goal of improving significantly the outcomes of cancer research for the patient. The Terry Fox Research Institute supports research through a highly collaborative, team-oriented, milestone-based approach that will enable discoveries to translate quickly into practical solutions. The Institute is seeking a full-time

## Senior Research Programs Manager

to join its team in Vancouver and help administer research projects of the Terry Fox Research Institute. These projects range from discovery-based team grants, personnel awards through to milestone-driven, team-oriented, pan-Canadian research programs. The Senior Research Programs Manager will manage award competitions, peer-review and results-oriented administration of resulting awards. Working with online systems will be a key responsibility thus demonstrated computer literacy is required. For further information about this role, please [click here](#).

Equipped with a level of education, training and cancer research experience at the post-doctoral level in a scientific subject, with four (4) or more years' work experience in a research-related environment, you will also have worked to communicate the results of research to a broader public. Excellent planning and organizational skills are required. Fluency in French would be an advantage.
